Github: github.com/IShinkarenko

PROFESSIONAL SUMMARY

Senior frontend engineer with 9 years building production web products in fintech, proptech and legal tech, for teams in Spain, the UK, Germany and the US. Deep in React, Next.js and TypeScript, with full-stack reach into Node.js, GraphQL and AWS. Since 2024: LLM features in production and an AI-assisted workflow where every line still goes through tests, review and me. Based in Alicante, Spain. Remote, CET.

PROFESSIONAL SKILLS

- **9 years of experience** building production web applications
- Strong skills in **JavaScript, TypeScript**
- Experience with **React, Next.js, Node.js**
- Experience with **GraphQL, React Query, REST APIs**
- Experience with public APIs - **Google Ads API, Facebook API, Amazon Ads API**
- Mastery level skills **Tailwind, ChakraUI, React-Aria, JS/CSS Animation, WebGL, 3D animation, HTML, CSS3, AG Grid, SPAs, Micro-Frontend Architectures.**
- Experience with state management - **Redux, Zustand, React Context**
- Experience with CMS - **Contentful, Content Hub ONE**
- Experience with **MongoDB, PostgreSQL, DynamoDB, AWS Services**
- Experience with CI/CD - **GitHub Actions, Docker, deployments on Netlify, AWS**
- Experience with testing - **Jest, React Testing Library, Playwright**
- Experience optimising websites using web performance best practices (Core Web Vitals, Lighthouse), monorepos, pnpm, storybook

RECOMMENDATIONS

AI & LLM ENGINEERING

- Experience **integrating LLM APIs** (Anthropic Claude, OpenAI) into production web applications
- **Built AI-powered product features** - content generation, summarization, and classification
- **Strong prompt engineering skills**: system prompt design, few-shot prompting, structured JSON output for reliable app integration
- **Experience with agentic workflows** - tool use / function calling, Model Context Protocol (MCP)
- **AI-augmented development workflow**: daily use of Claude Code, Cursor, GitHub Copilot for implementation, refactoring, debugging, and code review

WORK EXPERIENCE

Finaloop | E-commerce accounting, fintech | Spain, remote | Jan 2024 – Present
Senior FullStack Engineer (Oct 2025 – now) · Senior Frontend Engineer (Jan 2024 – Oct 2025)

- Ads and Loans domains: the services that bring ad spend and lender activity into customers' books.
- Built and maintain integrations with Google Ads, Meta Ads and Amazon Ads: API extractors, report scrapers and data pipelines for spend, invoices and billing.
- Designed billing-detection logic across complex account hierarchies so every dollar of spend lands in the right place in the ledger.
- Built an in-app "missions" system that detects broken connections and missing permissions and guides customers to fix them.
- Developed validation that reconciles calculated balances against the general ledger before discrepancies reach customers.
- Ship LLM-powered features (classification, summarisation) with structured output and evals.
- Tech Stack: TypeScript, Node.js, GraphQL federation, PostgreSQL, Temporal, Snowflake, AWS, Kubernetes, Playwright. 40+ service monorepo.

Clikalia | Proptech | Spain, remote | May 2023 – Jan 2024
Senior Frontend Developer

- Customer site, operations back-office, shared libraries, investor analytics.
- Built and maintained the design system six Next.js apps ship on: 106 components, 61 Storybook stories, 42 test suites. Authored a second UI package from scratch.
- Owned sales formalization end to end in a micro-frontend back-office: contract generation, e-signature, direct debit, reservation lifecycle. Wrote the Node services that generate the contracts.
- Shipped the platform in multiple languages, plus the conversion tracking growth runs on. Built investor dashboards on a BigQuery-backed API, deployed via GitHub Actions, Docker and Argo CD.
- Tech Stack: Next.js, TypeScript, Node.js, Storybook, BigQuery, Argo CD.

Publicis Sapient | Enterprise consultancy | Remote | May 2022 – Aug 2023
Senior Associate Technology L1

- Frontend engineer on a 20–30 person team building three public websites for Diriyah, a cultural and tourism development near Riyadh (diriyah.sa and two sister sites).
- Built the shared component library first, so three sites stayed consistent and shipped fast.
- Working software at every client demo, in short sprints, everything from scratch.
- Arabic and English, RTL layouts, CMS-driven content for hotels, districts, events and news.
- Tech Stack: React, Next.js, TypeScript, GraphQL, AWS.

LeadTrust | Referral-marketing SaaS, startup | USA, remote | Apr 2020 – May 2022
Senior Frontend Developer (contract)

- Software to promote, capture and reward referrals. The founder needed the whole product built from zero, without hiring a team. Built it with him over two years, from loose requirements to beta.
- Scoped undefined requirements into two-week sprints so the founder could change direction without renegotiating a team.
- Built the frontend and the referral and promo-campaign features: Next.js, React, conversion-focused UI.
- Serverless on AWS to keep costs tied to usage: AppSync (GraphQL), Lambda, Fargate, S3 + CloudFront.
- Worked daily with the CEO; at most two people on the engineering side the whole time.
- Tech Stack: Next.js, React, TypeScript, AWS AppSync, Lambda, Fargate, S3, CloudFront.

Earlier | Kharkiv, Ukraine | 2016 – 2020

Frontend Developer, React

- IdeaSoft.io · ITOMYCH STUDIO · IT Svit
- React, Redux, TypeScript, Material UI, SCSS, Webpack, Three.js, PWA, Gatsby

EDUCATION

Kharkiv Banking University — Master's degree, Banking and Financial Services
